Abstract

The article deals with the general social and economic features of the formation of the state of Ukraine comparing with similar indicators characterizing the Republic of Poland. The indicators of the dynamics of a gross domestic product; generalized indicators of economic efficiency; and the geographical structure of indicators of foreign trade relations of Ukraine and Poland have been analyzed. Studying the issues of intensification of Ukrainian-Polish cooperation, as well as the study of different socio-economic indicators of these countries in all dimensions, is one of

the most pressing scientific problems from establishing effective mechanisms for bringing Ukraine closer to the European Union, as well as forming the appropriate basis and tools for mutual relations.

Keywords

Socio-economic development Gross domestic product Economic efficiency
